Andrei Repo

Spain (Remote) | contact@andreirepo.com | LinkedIn | GitHub | Personal Website

Summary

Senior QA Engineer specializing in high-throughput SaaS and regulated platforms, with a track record of building scalable test automation (Playwright, Cypress, WebdriverIO) to enable secure, compliant CI/CD and rapid releases. Owns end-to-end quality-from APIs to mobile-in Agile, distributed teams. Drives efficiency, mentors engineers, and delivers auditable, high-stakes software with zero critical post-release defects.

Work Experience

Open Assessment Technologies S.A. **Jun 2026 - Present**
QA Automation Engineer *Spain (Remote)*
- **Framework & Stability Ownership:** Maintain and optimize web and API test suites (Cypress), refactoring test logic to resolve async browser issues and eliminate flaky tests.
- **CI/CD & Execution Optimization:** Manage GitHub Actions integration, implementing test parallelization and debugging pipeline failures to ensure reliable release deployments on AWS.
- **Cross-Functional Delivery:** Partner with Developers, Manual QA, and DevOps to execute high-value regression suites, manage Jira defects, and report release risks.

Maple International Ventures Limited (Lottomart) **Nov 2025 - May 2026**
QA Engineer *Spain (Remote)*
- Developed and maintained robust automated end-to-end tests using WebdriverIO, containerized with Docker for consistent execution and debugging; integrated into CI/CD to enable rapid feedback and reliable regression coverage.
- Architected an agentic AI-assisted QA workflow that integrated project-specific context and rules into the development lifecycle, ensuring all WDIO scripts adhered to strict quality standards and architectural best practices.
- Executed end-to-end manual and automated testing within an Agile Scrum team to deliver high-quality features for Lottomart's regulated iGaming platform.
- Collaborated closely with developers to improve testability, promote quality ownership, and ensure software met functional and compliance requirements.

Sketch B.V. **Oct 2021 - Jul 2025**
QA Engineer *Spain (Remote)*
- Led the migration and long-term adoption of a Playwright-based automation framework, replacing Cypress to improve stability, reduce execution time by 30%, and expand coverage for complex user workflows.
- Designed and maintained custom Playwright fixtures, utilities, and reporting pipelines, ensuring scalable and reusable automation across teams.
- Implemented comprehensive API validation and monitoring strategies using Postman, ensuring system reliability and early identification of critical bugs through shift-left testing.
- Developed automation support scripts in Bash and Python for test utilities and data validation, optimizing CI/CD integration workflows using GitHub Actions.
- Mentored engineers in Playwright best practices, enabling cross-functional teams to transition smoothly and deliver more reliable automation at scale.
- Maintained XCTest UI test suites for macOS applications, ensuring feature stability and comprehensive regression coverage.

Playtech plc **Jul 2018 - Sep 2021**
QA Automation Engineer *Gibraltar (Remote)*
- Owned quality strategy for Games Marketplace web platform, providing strategic guidance that enhanced team performance and improved software quality across distributed cloud microservices.
- Built and maintained Cypress E2E suites, integrated with Jenkins, cutting release cycle time by 60%.
- Collaborated with CTO, DevOps, and architects to embed quality gates into deployment pipelines and improve observability.
- Proactively implemented enhanced non-functional testing including API performance testing and monitoring, leading to more resilient applications.
- Validated large-scale JSON data processing pipelines, ensuring accuracy and consistency across microservices architecture and container-based deployments.

The Rank Group plc **Aug 2017 - Jul 2018**
QA Engineer *Gibraltar, Gibraltar*
- Delivered high-quality releases for 2 casino websites and 5 mobile apps through rigorous regression, integration, and smoke testing.
- Built a UAT validation framework from scratch, enabling stakeholder sign-off with zero critical post-release defects.

Ladbrokes Coral Group plc **Apr 2016 - Aug 2017**
QA Analyst *Gibraltar, Gibraltar*
- Executed test cycles for Coral Sportsbook across web and mobile in Agile/Scrum teams.
- Bridged communication between product, offshore devs, and QA to ensure on-time, high-quality deliveries.

Projects

Automated Personal Portfolio (andreirepo.com) | Astro, TypeScript, Docker, GitHub Actions GitHub

Self-Hosted Environment

- Built a self-hosted, containerized web app with CI/CD quality gates, automated WCAG accessibility testing (axe-core), and AI-assisted code review checks.

Infrastructure Automation Platform | Kubernetes, Jenkins, Prometheus, Proxmox

Self-Hosted Environment

- Deployed a single-node Kubernetes cluster to manage containerized apps.
- Configured Prometheus for monitoring and Jenkins for automated deployments.

Full-Stack Todo Application | React, Node.js, MongoDB, Docker, Traefik GitHub

Hosted on AWS

- Built a secure, containerized CRUD app with auth, deployed via Docker + Traefik with Let's Encrypt HTTPS.
- Implemented Playwright E2E tests in GitHub Actions, achieving 95%+ reliability and demonstrating full-cycle ownership from code to production.

Skills

- **Test Automation**: Playwright, Cypress, WebdriverIO, Selenium, Postman/Newman, Detox, Appium, k6
- **Cloud & DevOps**: AWS, Docker, GitHub Actions, Jenkins, Terraform (IaC), Kubernetes
- **Languages**: JavaScript, TypeScript, Python, Bash
- **Quality Practices**: Shift-left Testing, BDD, Risk-Based Testing, API Validation, Performance Monitoring

Education

University of Oxford, Department for Continuing Education **Sep 2014 - Jul 2015**
Undergraduate Advanced Diploma, IT Systems Analysis and Design *Remote*

Certifications

- AWS Certified Cloud Practitioner: Cloud architecture and services expertise.
- AWS Solutions Architect Associate (Expected Q4 2026): Advanced cloud solution design.
- ISTQB® Certified Tester - Foundation Level: Software testing principles and techniques

Languages

- English (Full Professional Proficiency)
- Spanish (Professional Working Proficiency)
- Estonian (Limited Working Proficiency)
